

REMARKS

This Preliminary Amendment is being filed with a divisional patent application. Claims 1 – 29 were divided out of the parent application as the result of a restriction requirement and are being prosecuted in this divisional application. Claims 30 – 55 are being prosecuted in the parent application and, therefore, have been canceled in this divisional application. New claims 56 – 62 are being added by amendment. These claims are supported in the drawings in FIGS. 4 – 13 and the portions of the specification that discuss switch 208, capacitor 502, conductive oxygen barrier 236a, moat 450, and nonconductive oxygen barrier 460a, such as page 15, line 27 through page 20, line 21.

Claims 1 – 29 and 56 – 62 are believed to be in condition for allowance and their consideration and allowance is respectfully requested. The divisional application and fee are enclosed. If any additional fee is seen to be required, please charge Deposit Account No. 50-1848.

Respectfully submitted,
PATTON BOGGS LLP
